Upload Team Logos for Live Stats

If the teams competing in your event do not have logos stored in our logo library (NCAA Division I and II), you can upload logos to integrate into the live stats for a game. You will need to know the home and away teams beforehand.

Note that the home and away teams in your scorekeeping software/XML file must match the home/away designations you use for uploading logos, otherwise logos will appear flipped in the stats.

Logo files must meet the following guidelines to be uploaded. Files that do not meet these guidelines will be rejected for upload:

- Format must be PNG, GIF, or JPG and file must have proper file extension (.jpg, .jpeg, .gif, .png)
- Dimensions of logo must not exceed 500 pixels in width by 500 pixels in height
- Size of logo file must be less than 2MB in size
